

**Tony Ross**

**BVSc MSc PhD Registered Specialist in Anatomical Pathology.**

Since graduating from the University of Sydney in 1973 I have worked mainly in veterinary diagnostic pathology in the university, government and private sectors. I have research interests in infectious diseases and tumours of livestock and wildlife.

For the last 3 years I have been a consultant pathologist working in Tasmania, Victoria and New South Wales. In addition I spent several months of 2007 and again in 2008 as a visiting Professor at the University of Illinois teaching anatomical pathology to residents and final year vet students.

I have held the honorary offices of Scientific Co-ordinator of the Australian Society for Veterinary Pathology and Scientific Co-ordinator Australian Animal Pathology Standards Program for a number of years. In 2009 I am an invited speaker at the annual conference of the American College of Veterinary Pathology and at the summer school of the European College of Veterinary Pathology and continue part time teaching and diagnostic work.

My passion is continuing education in veterinary pathology. I have enjoyed setting up online services for AAPSP members including study units in veterinary pathology and full slide digital images of histopathology cases which can be viewed online at 1x, 4x, 10x, 20x and 40x.
